Finishing your blanket

Joining

Before joining block each square to the correct 20cm x 20cm measurements. If needed you can add an extra row in the last colour you used around any squares that are slightly smaller.

Lay out squares in the correct order.

Take 2 squares and with RS facing together and grey join yarn with a SS to one corner. Working into back loops only, dc across row to join the 2 squares together.

Continue joining each square in this way until all squares are joined. Some squares may have more stitches than other so it is best to pin the beginning and end of each square together to make sure they fit nicely.
